INVEST IN THE NEW DISCOVERIES OF PHYSIOLOGICAL MECHANISM AND MEDICAL TECHNOLOGY

Organ Rhythm is the underlying mechanism of the
Circadian Rhythm, it conducts health and disease.

Innovative Technology of Stimulating the Intrinsic Motivation of Health

Breakthrough in

Anti-Aging:

Severe facial wrinkles achieve stable and continuous improvement within three days which is based on our senescent cell repair technology.

Difficult Diseases:

Alzheimer's disease, gene checked Spinal muscular atrophy, Adenomyosis, Hematuria after kidney stone surgery, Heart discomfort, Severe insomnia, Digestive and metabolic disorders all reversed within two weeks which is based on our multi-factors analysis system and creative rehabilitation method of Organ Rhythm Conditioning.

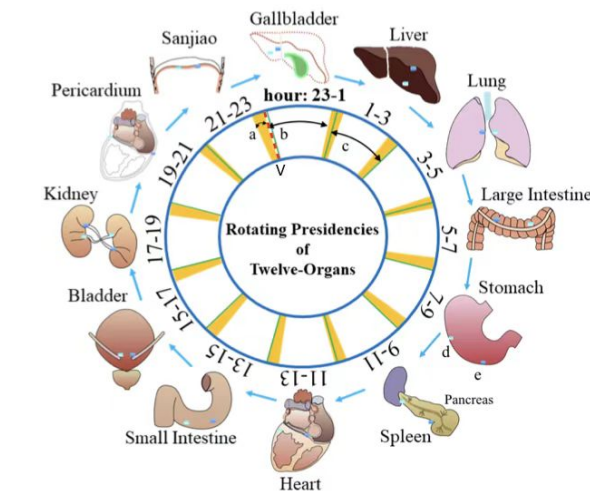

Chronic Pain Relief:

The neck pain, knee pain and chronic pain can be continuously eliminated. It is especially suitable for burns and cuts. It takes effect immediately after being applied for a few seconds.

What makes these successful cases possible and diverse?

On basis of the finding of a new physiological mechanism
- **Organ Rhythm**

+

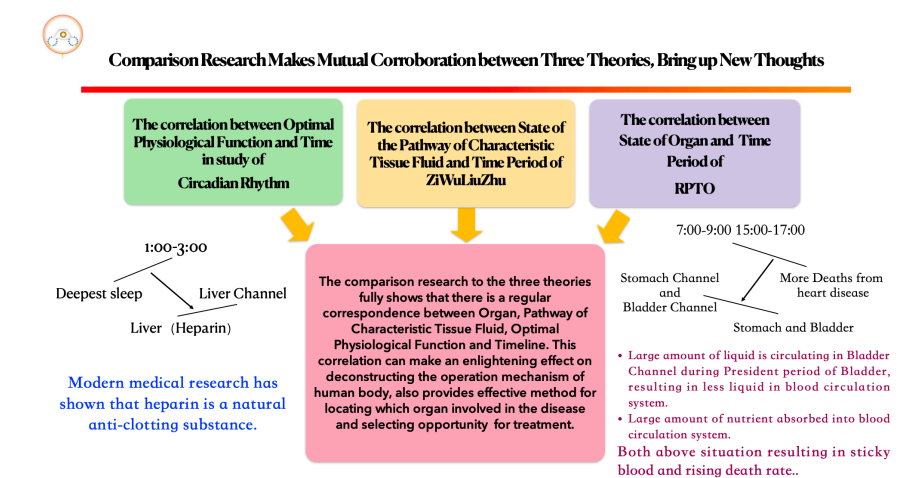

+

Relying on new U.S. patented invention of healing devices
- **Organ Rhythm Conditioner and Eye/U**

Supported by advanced Cross-disciplinary knowledge systems
of Circadian Rhythm and Organ Rhythm
- A profound understanding of **The Essence of Health and Disease**

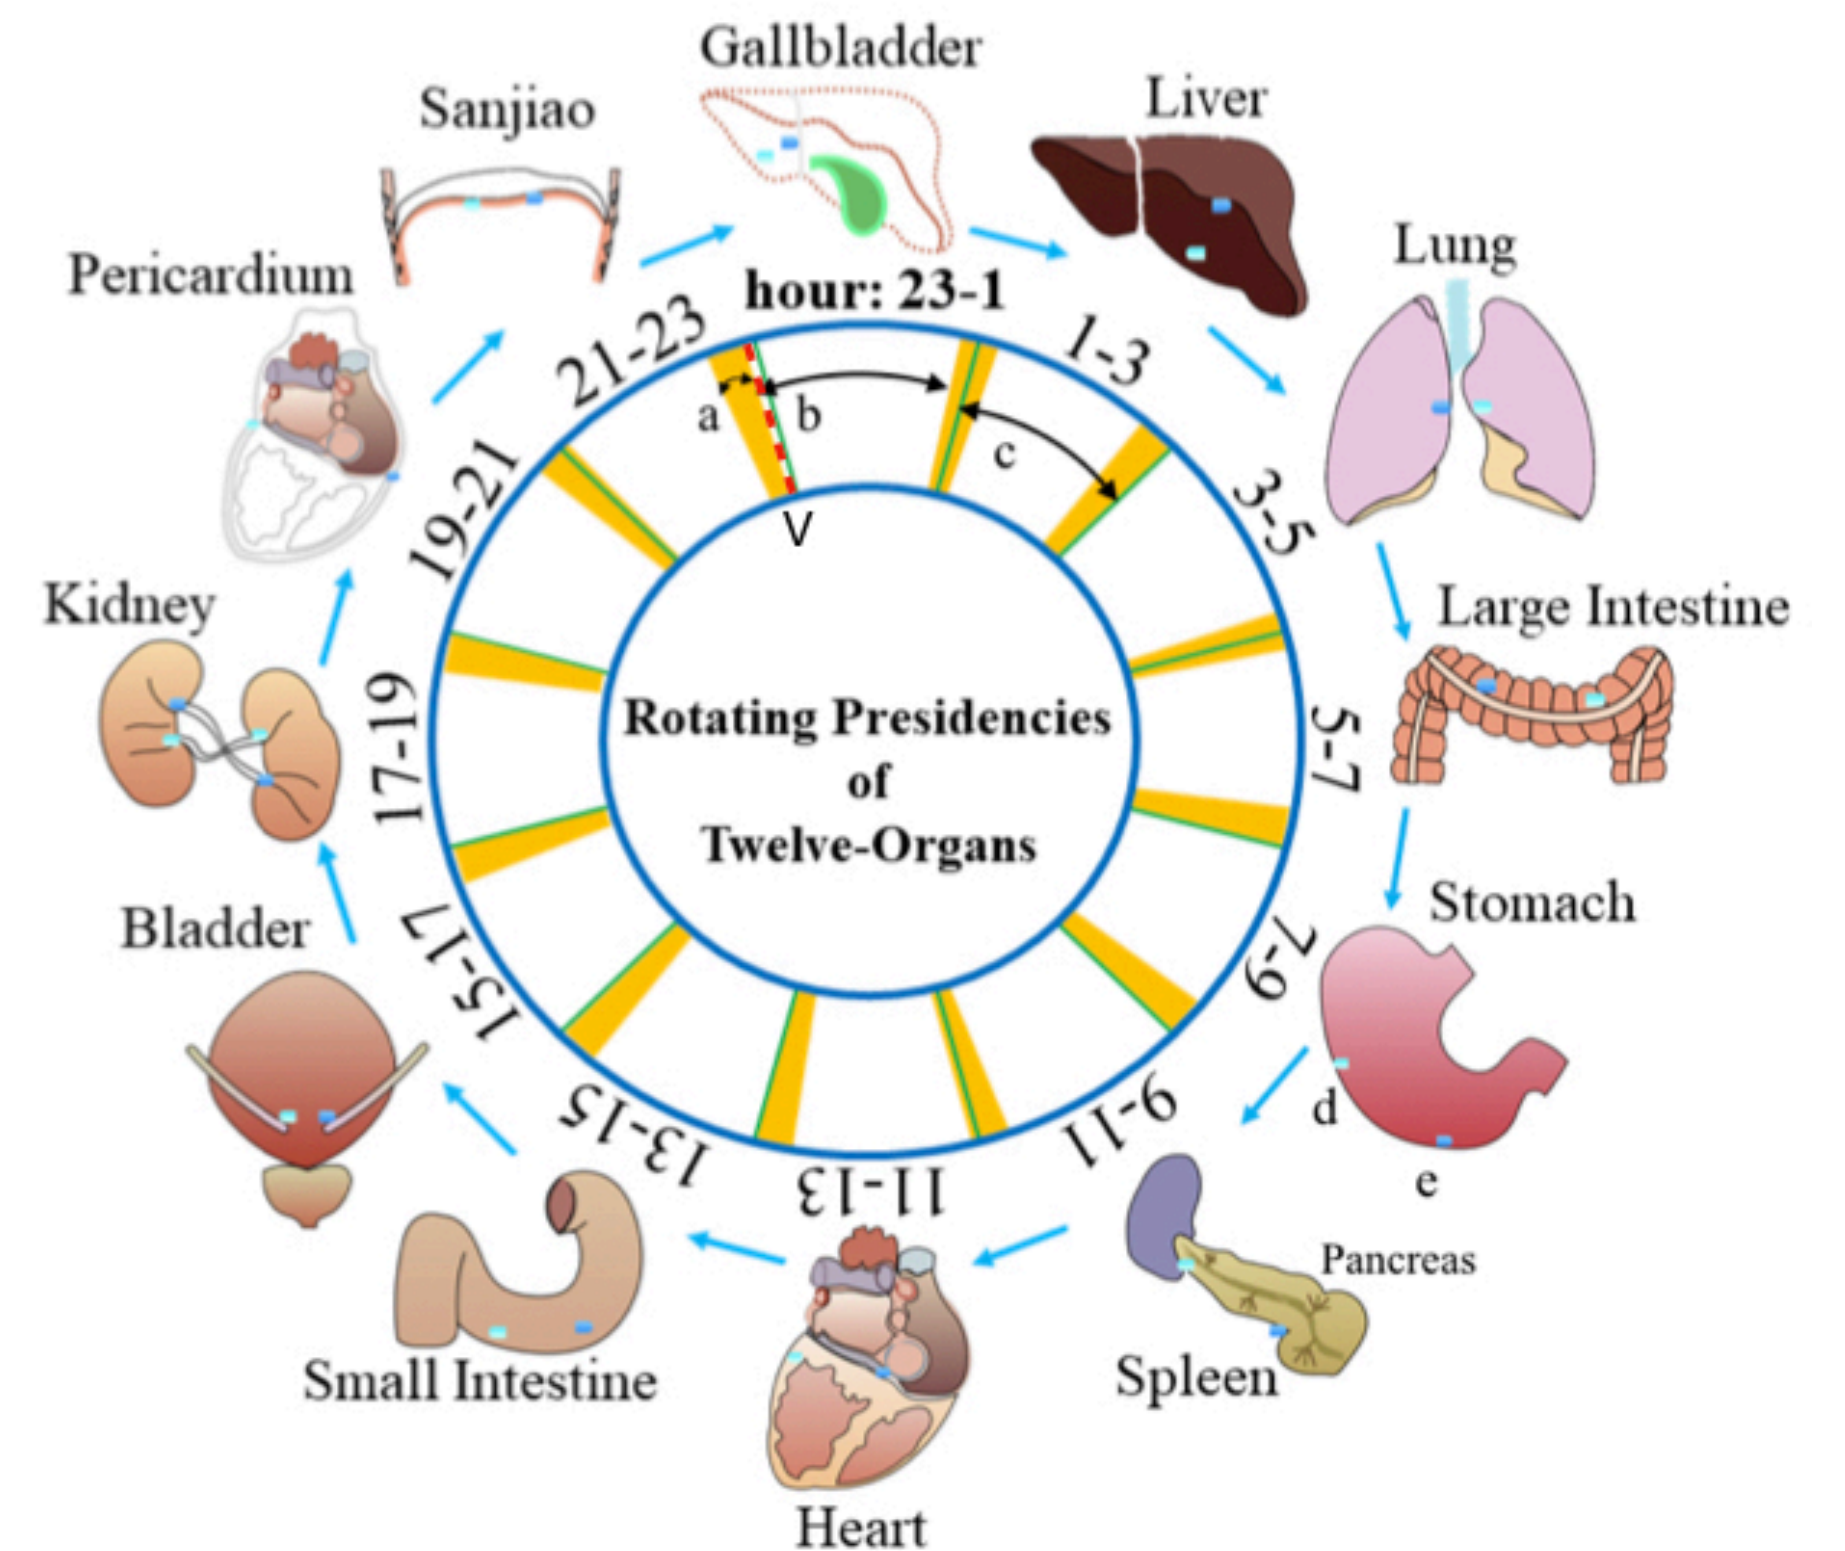

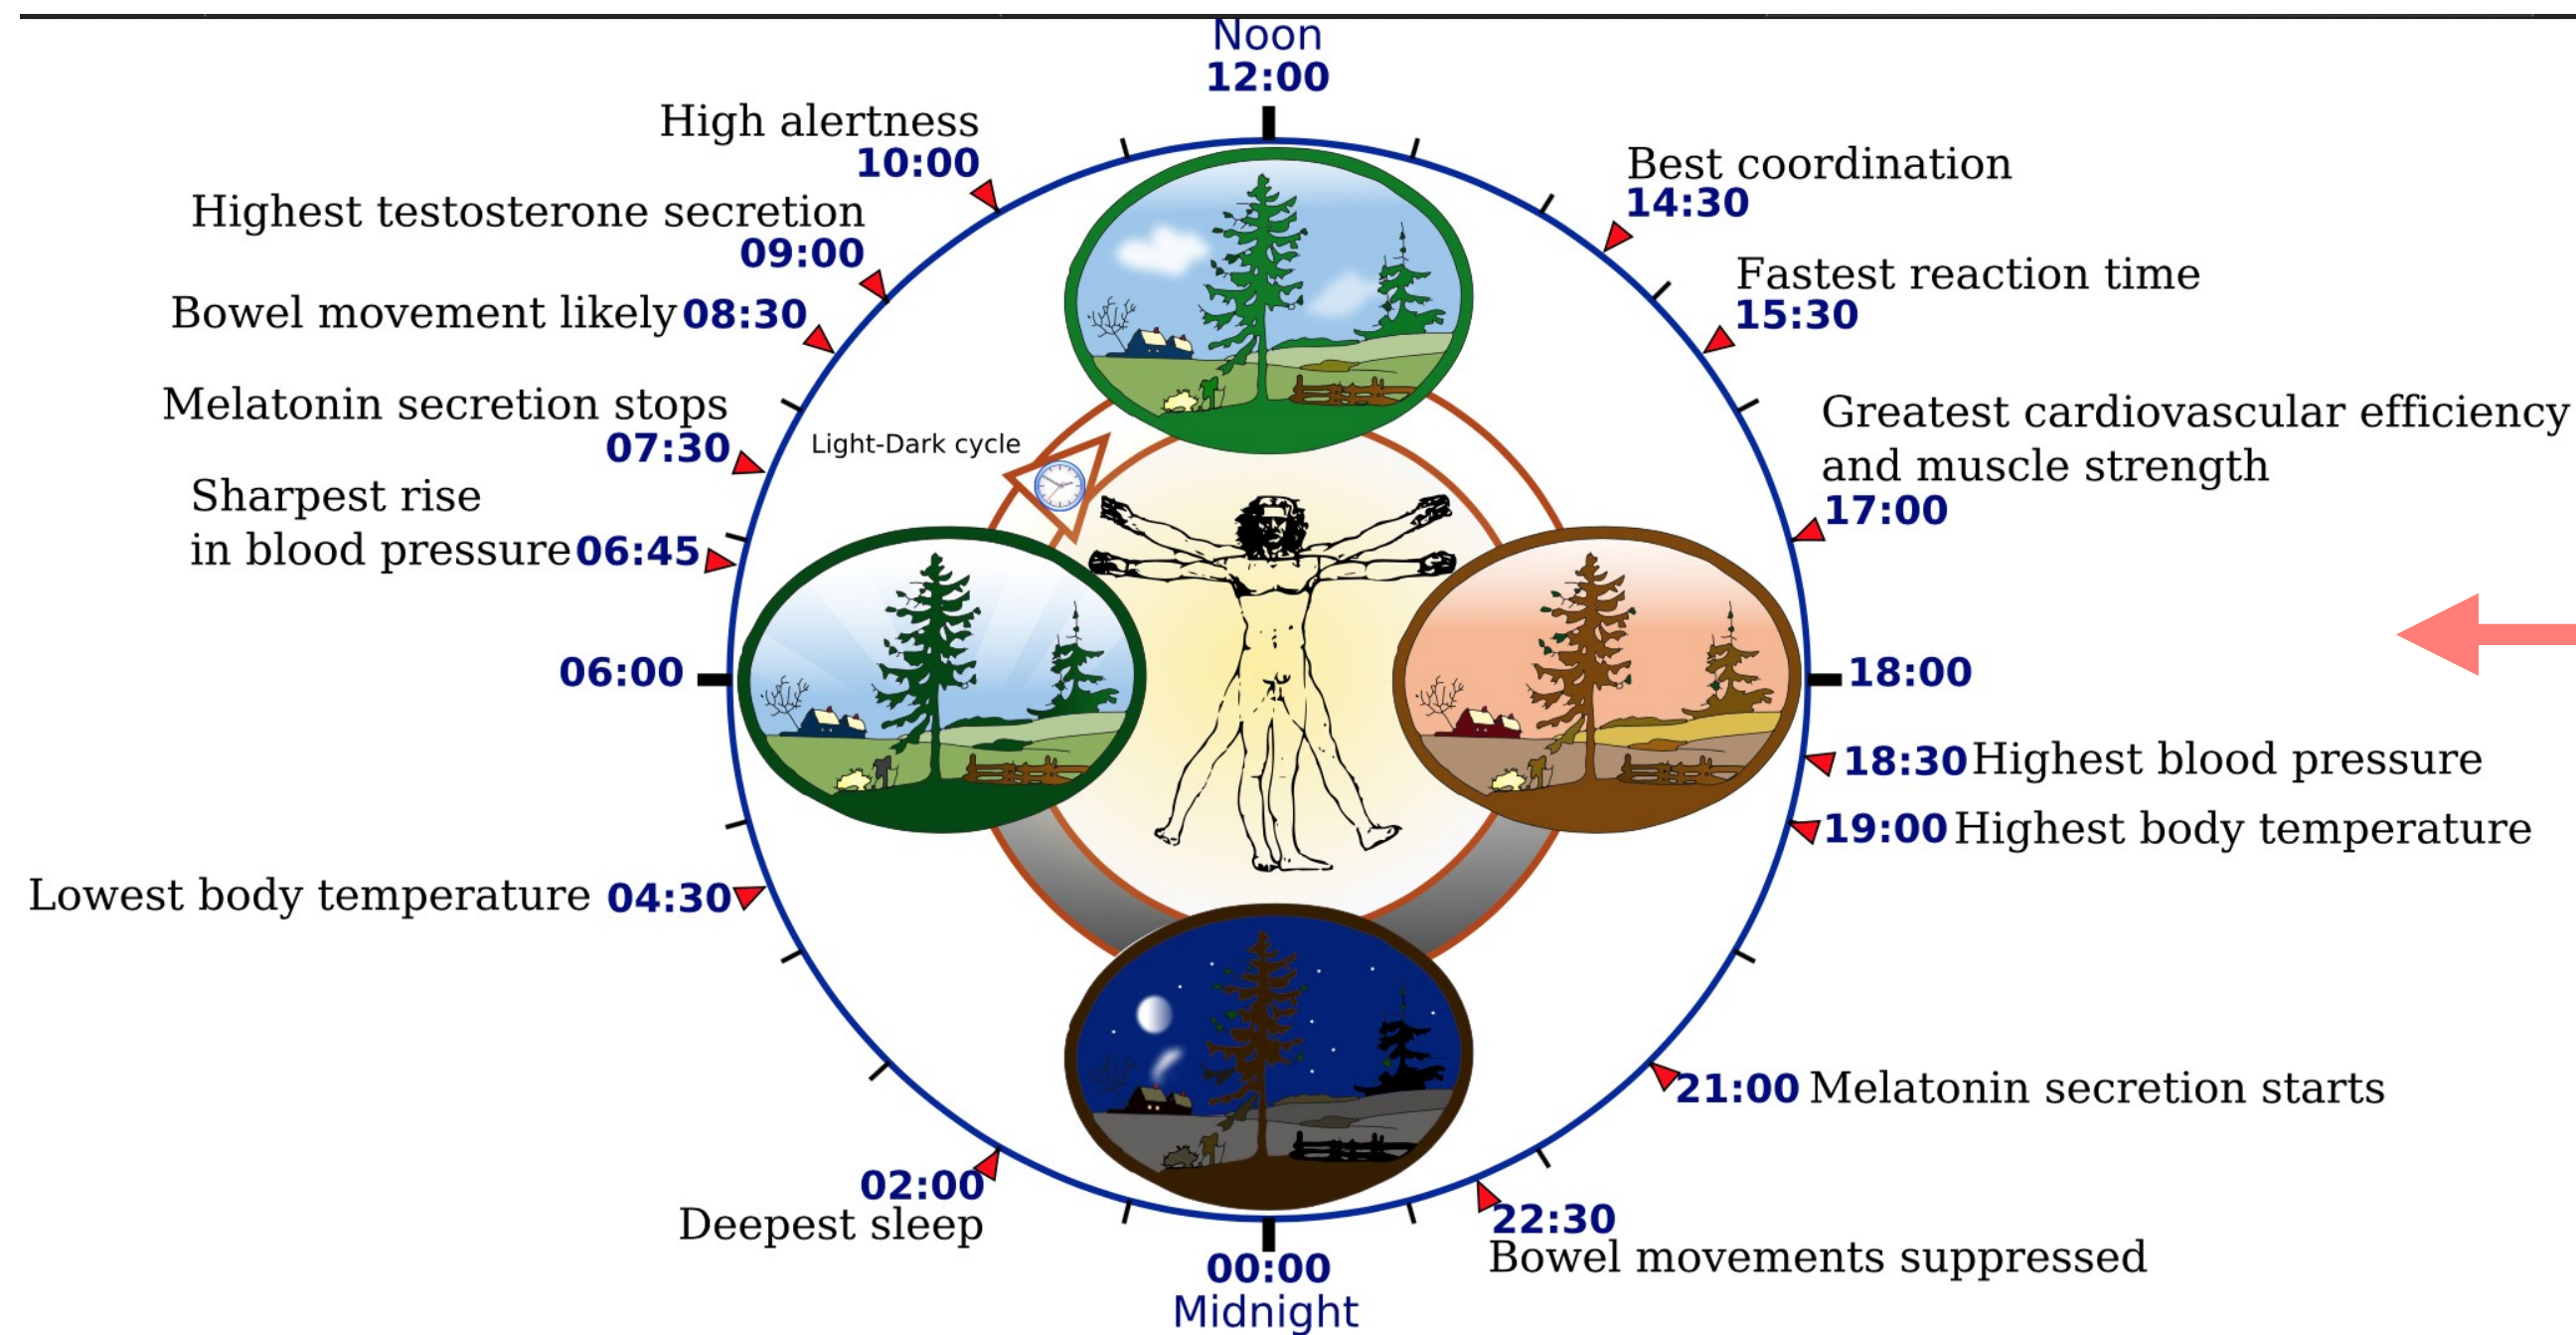

- Rare and difficult diseases
- Alzheimer's and Dementia
- Spinal muscular atrophy(SMA)
- Severe insomnia
- Anemia
- Indigestion
- All poor, excessive or chaotic functional symptoms

Confidence stem from Many kinds of **successful curative cases**

Breakthroughs Stem from Finding of New Physiological Mechanism

We found the **Organ Rhythm** which parallels the cardiovascular system, urinary system, digestion system etc. which is a program of making the thirteen visceral organs conducting the whole body metabolism in fixed sequence, to result the body manifests the optimal physiological function.

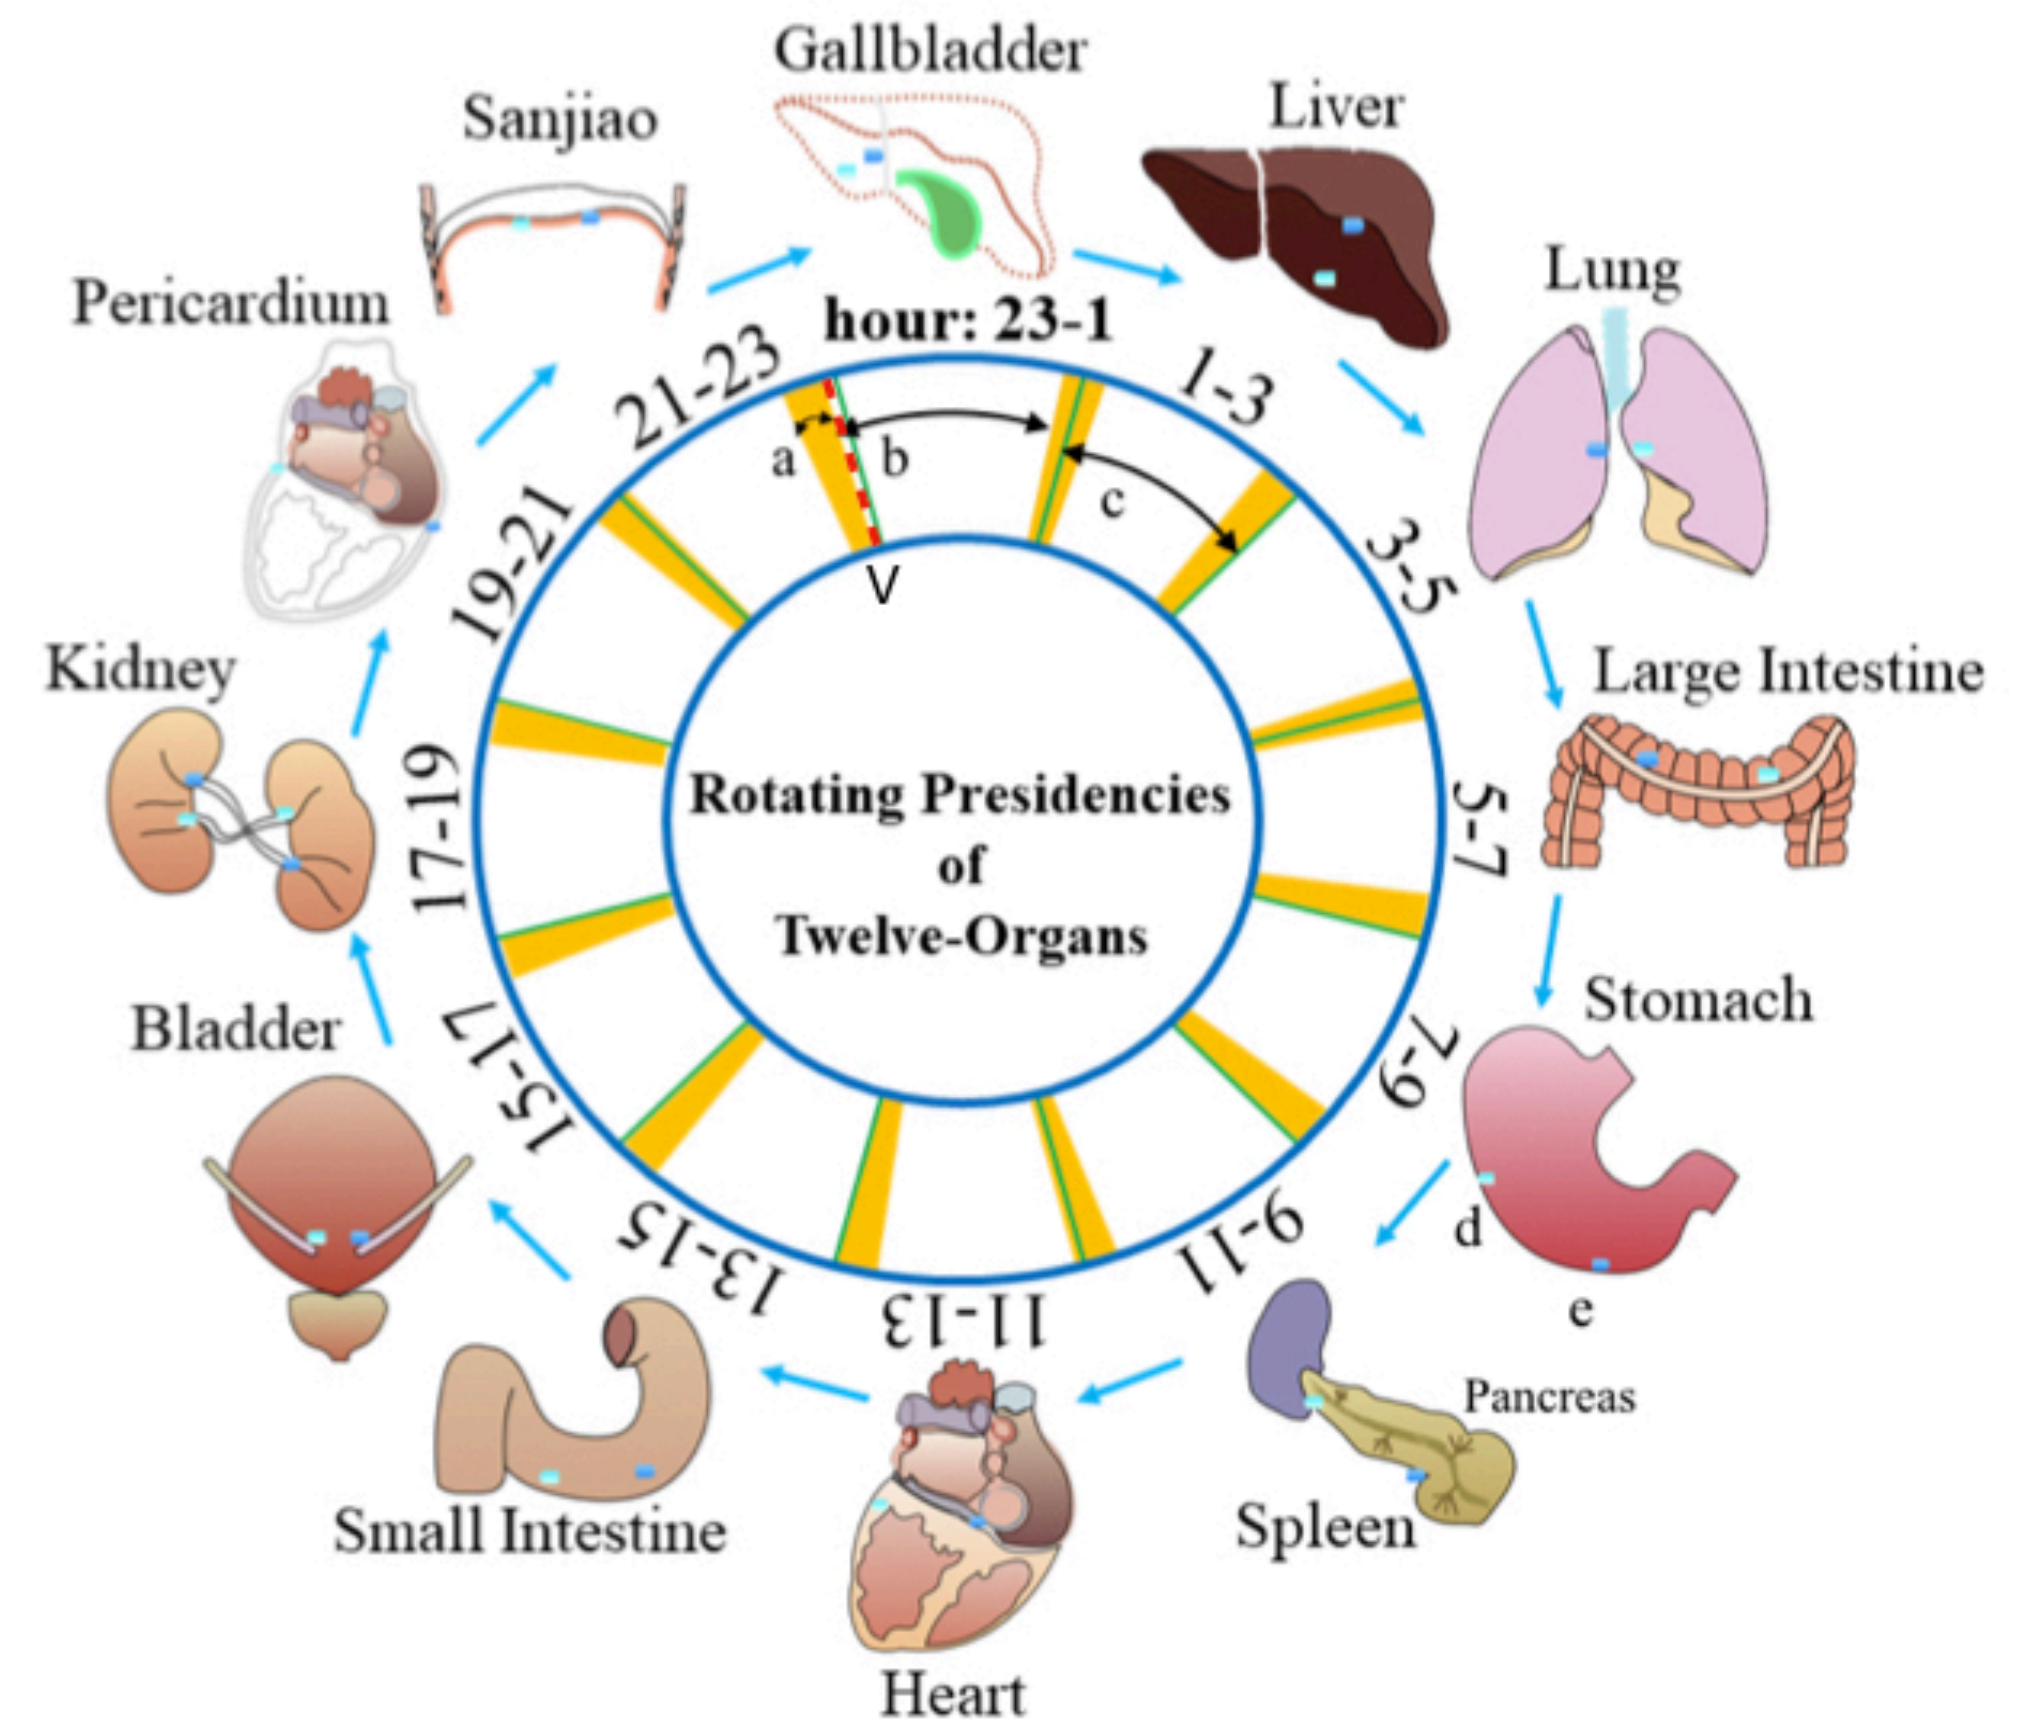

The Organ Sequence, Time and Functions of the Organ Rhythm

Organ Rhythm- The thirteen visceral organs each performs unique function in twelve rhythm and in the fixed sequence.

- 3:00-5:00 Lung- Conduct breath.
- 5:00-7:00 Large intestine- Conduct excretion.
- 7:00-9:00 Stomach- Conduct food decomposes
- 9:00-11:00 Spleen/Pancreas- Conduct labeling and assimilation.
- 11:00-13:00 Heart- Conduct power output.
- 13:00-15:00 Small intestine- Conduct absorption.
- 15:00-17:00 Bladder- Conduct liquid collection.
- 17:00-19:00 Kidney- Conduct water and liquid metabolism balance.
- 19:00-21:00 Pericardium- Conduct command transmission.
- 21:00-23:00 Sanjiao- Reset and Synchronization.
- 23:00-1:00 Gallbladder- Conduct recognition and solidification.
- 1:00-3:00 Liver- Conduct cleaning and rejection

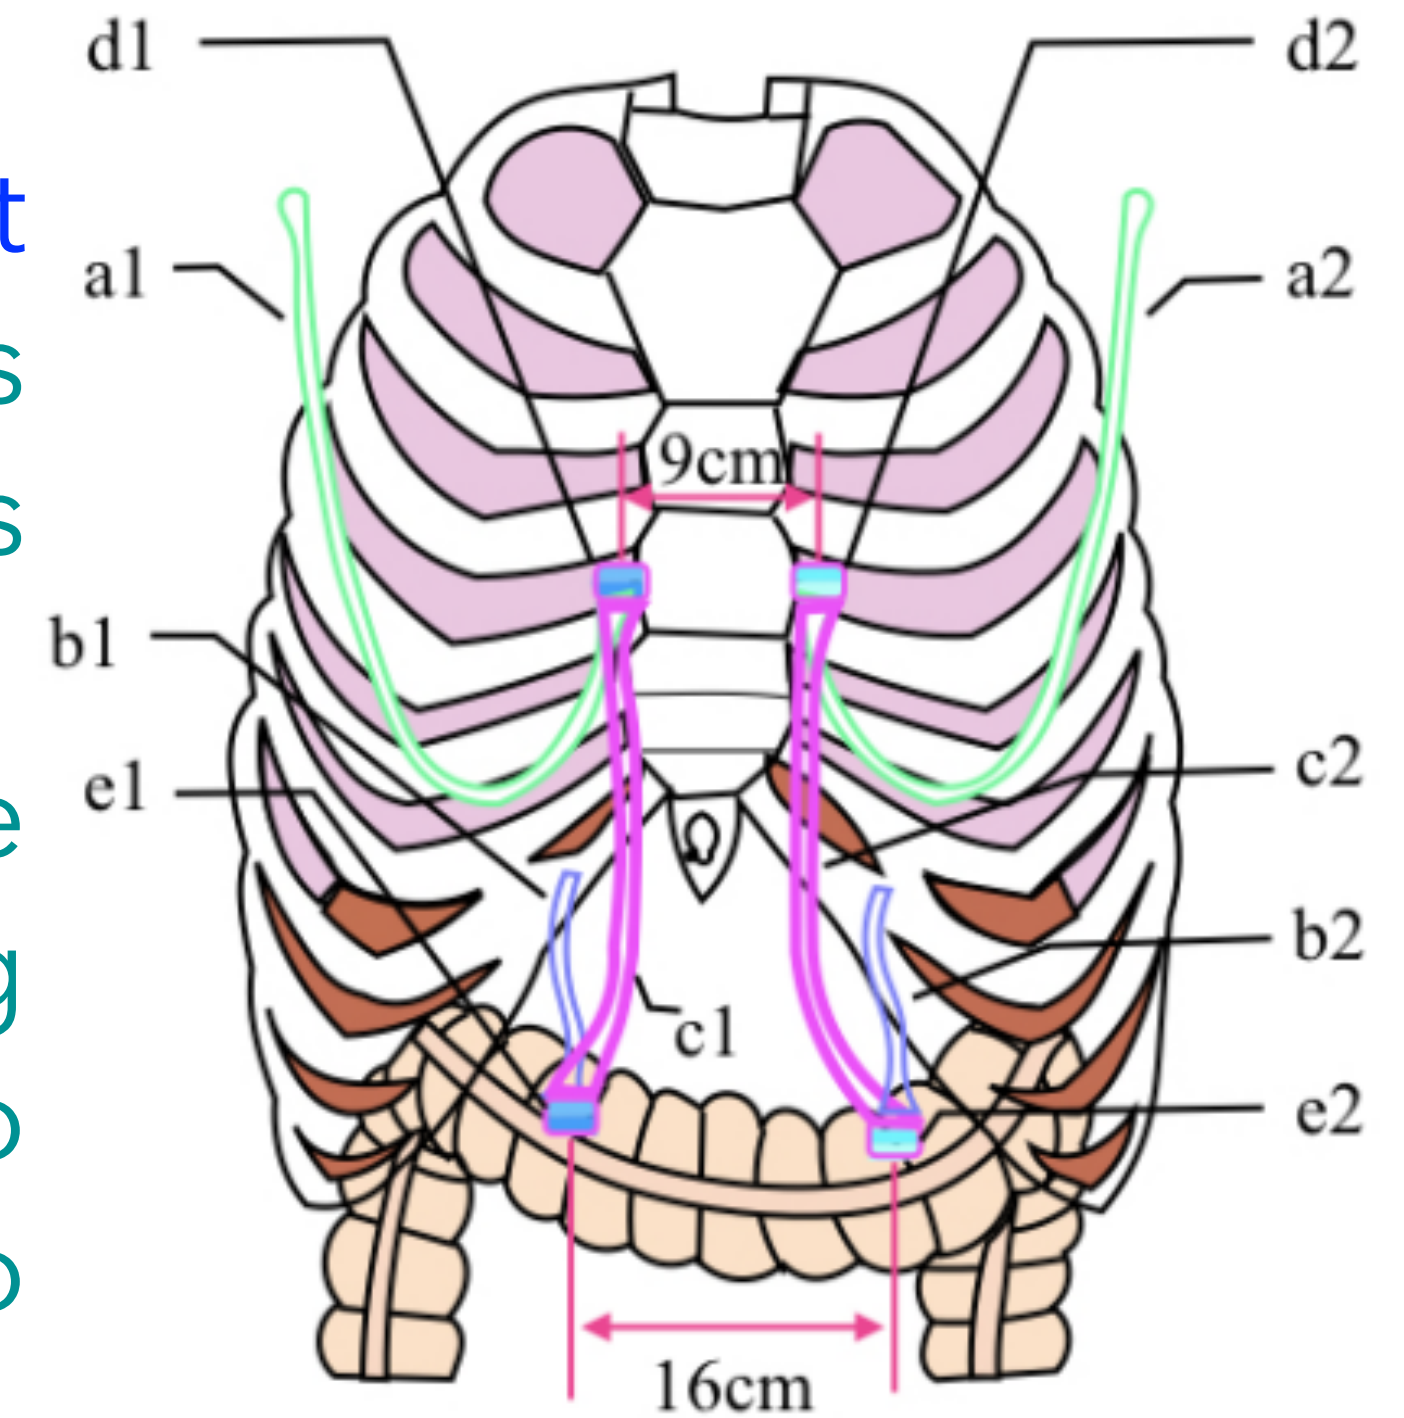

Organ Rhythm

Organ Rhythm Reveals a Series of Undetected Physiological Process

Every rotation of a organ has three steps in the physiological process

1. Handover Period: Like the president handover the important materials to the rear president. The predecessor organ transfers its characteristic functional substance to the rear organ.
2. Preparation Period: Like the designate president formulates a governance line. The rear organ constructs a new pathway to prepare for a new circulation of itself's characteristic functional substance.
3. President Period: Like the president being on duty. The organ on duty open its two membrane-doors permitting whole body's Jingqi flow through its intra-channel to spread out itself's characteristic functional substance to whole body tissues and cells.

Predicted Medical Application of the Physiological Process

1. **The Handover Period** brings a tip that any organ's proper functioning rely on the predecessor's normal working and the substance transfer efficiency between them.

This process may explain the transmission and transformation patterns of diseases, and be helpful to re-understands the non-isolation of the organ health.

The predicted medical application: Applying the multi-organ treatment can increase the remediation efficiency of the failure organ through dredging the intra-channel of the upstream and the downstream organs to improving passage capacity around the **Handover Period**.

2. **The Preparation Period** has not been found the direct effects for human function yet.

3. **The President Period** brings a tip that every organ has an intra-channel could be flew through but there is a temporal characteristic.

This process may provide the answer why do therapeutic effects of taking medicine, getting vaccinated, undergoing acupuncture vary over time, especially in the failure treatment of organ failure repair.

The predicted medical application: taking medicine, getting vaccinated, undergoing acupuncture in **the President Period** when the failure organ's intra-channel is predestinate in open status, suiting for substance exchange between inside and outside failure organ.

The Historical Patterns of the New Wave of Technological Revolution

Looking at the history of human technological development, every discovery of a principle has brought about a new round of technological revolution.

Cutting-Edge Principle and Diagnosis System

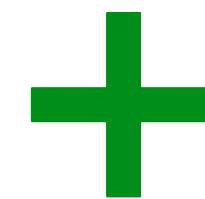

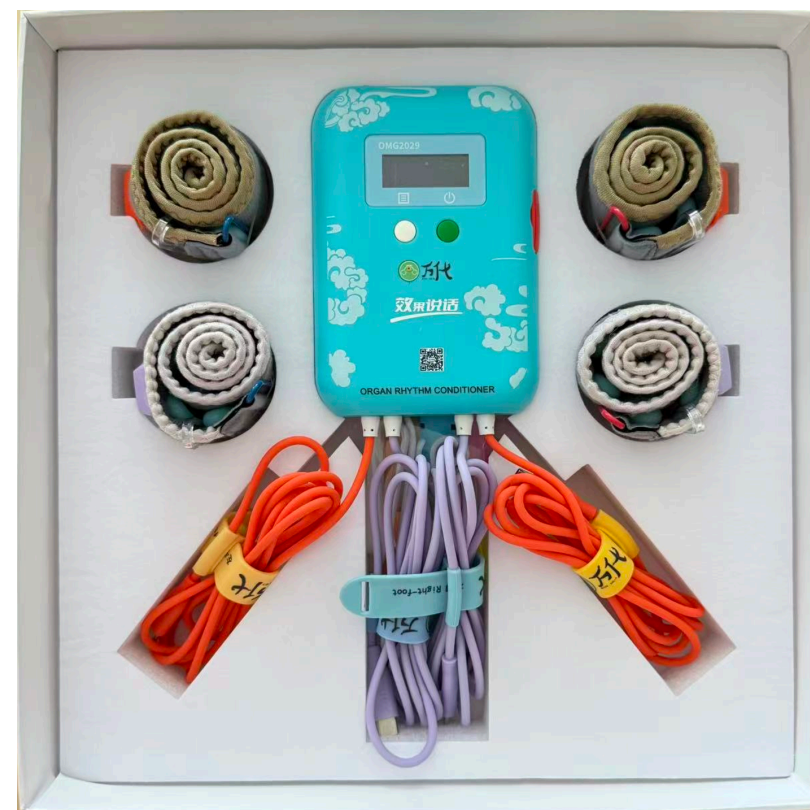

We have got the Organ Rhythm (Rotating Presidency of Twelve-organ) which is the underlying mechanism of human function.

Based on the profound understanding to the principle, We have created a multi-factors diagnosis system of "Onset time/ Symptoms/ Organ being on duty/ Optimal physiological function/ Characteristic functional substance/ Pathway" which can comprehensively seek up the pathogenesis of kinds of difficult and complicated diseases, guide to formulate corresponding therapeutic schemes.

Patented Technology and Products of Eye/U, Organ Rhythm Conditioner

In addition, we have invented a biofield technology applying in health which is with a chip to induce a magnetic field from human body, form an interactive entanglement between the acupoint and the chip to generate a continuous fluctuation, to stimulate the intrinsic motivation of health. The core technology and related products have been granted the U.S. and Korean invention patents.

Invest in Us Overlooking the Full-Chain Health Industry

Invest in us,

Standing with us backed the cutting-edge principle,

Grasping the advantage technology,

And patented products,

And practiced successfully curative cases,

**Overlooking the market of pain relief, chronic diseases,
rare diseases, beauty and longevity.**

Three days conditioning experience let you get a youthful state.
